

Board Maternity Update

September 2020

1. Update OMS
2. Maternity Dashboard (July 2020) – Key Indicators
3. Maternity COVID Update

OMS update

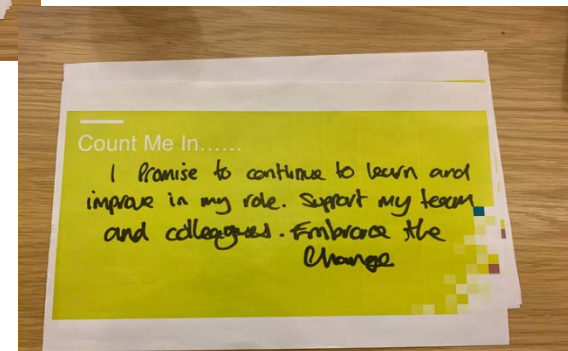

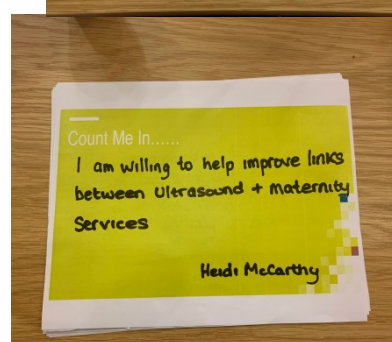

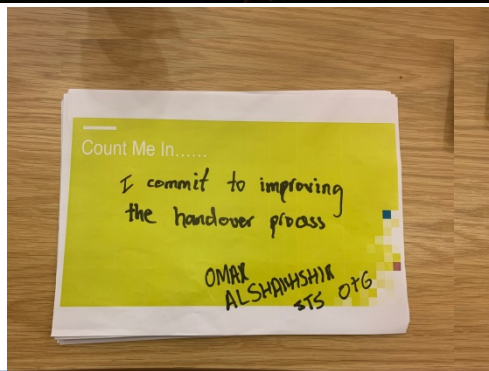

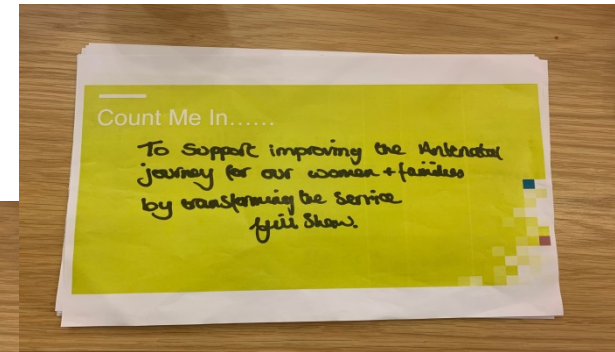

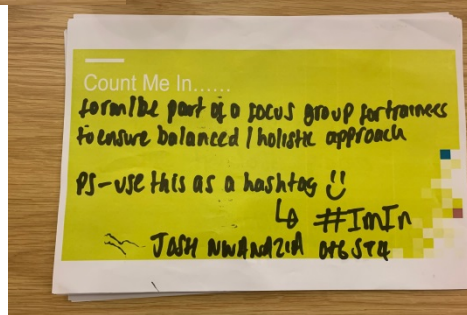

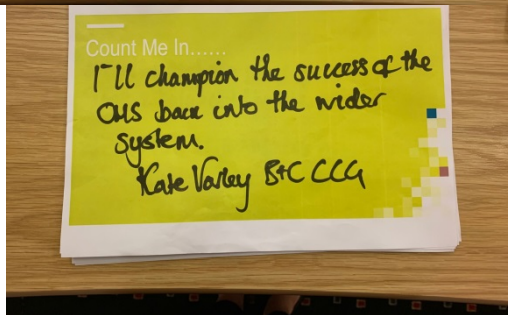

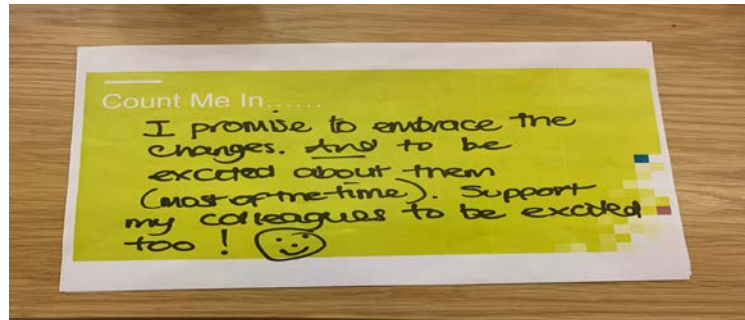

Bradford Teaching Hospitals
NHS Foundation Trust

- Programme now starting to take pace.
- OMS project team assembled including senior midwifery lead.
- Weekly project board meetings in place.
- Engagement with Band 7 midwifery leaders and Consultants.
- Triumvirate and members of senior leadership team benefitted from resilience session with Clive Lewis.
- Excellent launch event in August with 4 sessions over 2 days, with attendance and engagement from a quarter of the CBU workforce.
- Next Steps:
 - Collate wealth of information and ideas generated from launch.
 - Expressions of interest for specific work stream leads.
 - Maintain the momentum and energy generated at the launch through regular communication.
 - Further work shops to be offered.

Maternity Dashboard

Bradford Teaching Hospitals
NHS Foundation Trust

- Positive Metrics to note:
 - Planned Home Births on the increase following reinstatement of the Home Birth Team.
 - 1 to 1 care in labour rate >90% for last 3 consecutive months.
 - Number of babies actively cooled added to the dashboard. No cases for 5 consecutive months.
 - Stillbirth rate continues to demonstrate an improving position.
- Metrics to monitor:
 - Caesarean section rate slightly higher than usual for Bradford. Possibly due to an increased induction of labour rate. To observe trend of both over the coming months.
 - Breastfeeding initiation rates lower than desired at 60%. Issue has been addressed with ward managers in the absence of the infant feeding lead (Maternity leave).
 - High smoking at booking rate which is beyond the service's control but has been requested as an area of focus in the Act as One, Better Births work stream.

COVID Update

- No women experienced significant symptoms of COVID or required enhanced care/ITU during the reporting period.
- No reported cases of positive or suspected neonatal cases.
- Home Birth service restarted in June. Increased numbers of women booking for home birth.
- Partner visiting and attendance at scan preparations made and are ready to implement when local lockdown lifted.
- Staff and women's surveys regarding impact of COVID changes completed and collated by LMS midwife. Will feed into OMS programme and co-production of revised visiting policy with MVP and service users.
- Continuity of Carer pathways are now resuming and planning started for further pathways.
- Plan to 'step down' designated COVID zone on the Birth Centre from early September. LW and BBC teams working together to look at staffing models and how 1:1 care in labour rates are maintained.
